

DESCRIPTION

A Nonwoven Polyester spun bonded needle-punched membrane, designed to reinforce both water-based and solvent-based high build coatings. The product is readily saturated with the minimum of wastage and provides general reinforcement where small surface cracks are evident. It is an essential component of all liquid-applied waterproofing and damp proofing systems. Since it is NOT rot-resistant, it is essential that the user fully saturate the membrane to provide the required protection.

SPECIFICATIONS

Mass / Unit area (grams /sq metre)	: 110 average
Thickness (0,5 kpa)	: 0.9 mm average
Water Percolation (lt /sq M /second)	: 197
Tensile Strength (KN / Metre)	: 8.5
Elongation %	: 58
Penetration Load (Newtons)	: 573
Penetration Elongation %	: 53

SIZES

Jumbo Rolls 100 M long x 1 M wide

Cut Rolls 20 M long: 75mm wide, 100mm wide, 150mm wide, 200mm wide, 250mm wide, 300mm wide
